Diverse in professional background but united by a shared mission, our Board of Directors is comprised of leaders in health technology, public policy, healthcare delivery, information technology, safety innovation, and patient advocacy.

**Joe Kiani**  
Founder, Chairman, and CEO of Masimo Corporation

**Robin Betts, MBA-HM, RN**  
Assistant Vice President Quality & Patient Safety for Intermountain Healthcare

**Jim Bialick**  
Immediate Past President, Patient Safety Movement Foundation & Patient Safety Movement Coalition

**David Mayer, MD**  
Vice President, Quality and Safety for MedStar Health

**Jim Messina**  
CEO of The Messina Group

**Charlie Miceli**  
Vice President, Chief Supply Chain Officer, The University of Vermont Health Network

**Steven Moreau**  
President and CEO of St. Joseph Hospital

**Michael A.E. Ramsay, MD, FRCA**  
Chairman, Department of Anesthesiology, Baylor University Medical Center; President, Baylor Research Institute
STEERING COMMITTEE

This committee advises the Patient Safety Movement and makes recommendations to the Board of Directors on how to best fulfill our mission of ZERO preventable deaths by 2020.

HEALTHCARE PROFESSIONALS

Be the Change

Healthcare professionals are the frontline of patient safety. Their experience, insight into challenges, and commitment are absolutely essential to achieving the goal of ZERO preventable deaths by 2020.

With the input of leading clinicians, technologists, and patient-safety specialists, the Movement has identified solutions to the leading patient safety challenges that exist in our hospitals. These Actionable Patient Safety Solutions (APSS) are freely available and can be rapidly implemented today.

We call on healthcare organizations to implement our APSS or share with us their own best practices so that we may highlight their leadership and so that their experience may empower other institutions to make a commitment to 0X2020.

Make a commitment today at PatientSafetyMovement.org/commitments

Join the more than 1,600 healthcare organizations have already made a commitment to achieving 0X2020.

SUMMIT

Our annual World Patient Safety, Science & Technology Summit is the preeminent patient safety conference in the country. Committed clinicians gather with leading medical technologists, passionate patient advocates, and innovative policymakers to challenge the status quo, exchange ideas, and refine patient safety protocols.

Past Speakers

Joe Kiani
Founder and Chairman, Patient Safety Movement Foundation
Founder and CEO, Masimo Corporation

Vice President Joe Biden
47th Vice President of the United States

President Bill Clinton
Founder of the Clinton Foundation, 42nd President of the United States

Richard Carmona, MD, MPH, FACS
17th Surgeon General to the United States (2002-2006), Distinguished Professor, University of Arizona

Mark Chassin, MD
CEO, The Joint Commission

Patrick Conway, MD, MSc
Deputy Administrator for Innovation and Quality & CMS Chief Medical Officer

David Mayer, MD
Vice President, Quality and Safety, Medstar Health

Peter Pronovost, MD, PhD
Sr. Vice President for Patient Safety and Quality, Director of the Armstrong Institute for Patient Safety and Quality, Johns Hopkins Hospital

Kai Zacharowski, MD, PhD, FRCA
Director of the Department of Anesthesia, Intensive Care Medicine and Pain Therapy, University Hospital Frankfurt

Thomas Zeltner, MD
Special Envoy of the Director General of the World Health Organization (WHO)

The 5th Annual 2017 World Patient Safety, Science & Technology Summit will be held in February in Orange County, CA. Please visit PatientSafetyMovement.org/summit for more details.

HEALTHCARE TECHNOLOGY

Make the Change

Unfortunately today, many medical devices and information systems do not always communicate with one another meaning that vital, potentially life-saving, patient data may not be available when a provider or patient needs it. This is not a technology problem; it is instead the result of a business decision designed capture market share for a single product, even if it is at the expense of patient safety.

It is our goal to unlock medical device data to facilitate the creation of a Patient Data Superhighway that will support providers making clinical decisions and allow for the innovative development of algorithms that will serve as a safety net for patients that may otherwise slip through the cracks in a care setting.

The Movement is calling on all healthcare technology companies to lead the market by openly sharing the data their product is designed to generate, without prejudice.

Many companies have risen to this challenge and signed the pledge, others have gone even farther and now only do business with those that have made a similar commitment.

Sign the pledge today at PatientSafetyMovement.org/commitments

Join the leaders from the healthcare technology industry in taking the pledge to share their data.

Achieving 0X2020 will require fundamental changes throughout the continuum of care. We work with leaders from the healthcare professional, healthcare technology, patient advocacy, public policy, and payer communities to identify key patient safety challenges and develop actionable solutions that can be realistically implemented in the short term to address them.

We have developed APSS to address the following key challenges:

<table>

<td>Failure to Detect Critical Congenital Heart Disease (CCHD)</td>
<td>Culture of Safety</td>
</tr>
<tr>
<td>Early Detection of Sepsis</td>
<td>Optimal Resuscitation</td>
<td>Optimizing Obstetric Safety</td>
</tr>
</tbody>
</table>

Download and share our APSS at [PatientSafetyMovement.org/APSS](PatientSafetyMovement.org/APSS)
POLICYMAKERS

Stand up for Change

From both human and financial perspectives, the cost of preventable patient death is staggering:

- More than 200,000 deaths per year affecting millions of family members, friends, and colleagues.
- Up to $1.26 trillion per year is spent to treat medical errors.

But, as with any challenge of this magnitude, the opportunity to achieve positive change is equally vast. The Patient Safety Movement is a big tent organization that invites the contributions of the broadest spectrum of policy professionals: Patient advocates. Public officials. Public health professionals. Healthcare reformers. The Patient Safety Movement welcomes you all to the fight.

Follow our progress at PatientSafetyMovement.org
MISSION

The Patient Safety Movement Foundation is singularly focused on eliminating the more than 200,000 annual preventable patient deaths in the US by 2020 (0X2020).

TOGETHER WE WILL REACH ZERO PREVENTABLE DEATHS BY 2020

The Movement is a commitment-based organization that connects the dots between people, ideas, and technologies that are traditionally siloed in our healthcare system. We encourage commitments from healthcare organizations to implement actionable patient safety solutions and pledges from healthcare technology companies to share their data. Together we share the mission of:

1. Unifying the healthcare ecosystem;
2. Identifying the challenges that are killing patients to create actionable solutions;
3. Asking hospitals to implement Actionable Patient Safety Solutions;
4. Promoting quality and safety transparency;
5. Asking medtech companies to share the data their devices generate in order to create a Patient Data Super Highway to help identify at-risk patients;
6. Correcting misaligned incentives; and
7. Promoting love and patient dignity.

ONE PLUS 24,672 LIVES SAVED

At our 2016 World Patient Safety, Science, and Technology Summit we announced 1,624 healthcare organizations and 45 healthcare technology companies had made public commitments to 0X2020 resulting in one plus 24,672 lives saved.

We say “one plus 24,672” because it is important to remember that our commitment is to every life saved, not to the elimination of a statistic. We are extremely proud of our progress to date and prouder still that the world will be enriched by 24,673 more of our loved ones this year.

Achieving 0X2020 will require these numbers to grow by orders of magnitude every year, and in 2016 we are committed to reaching one plus 50,000 lives saved.
See the Change

We continue to gather and publish moving Patient Stories of preventable deaths in the hospital. These stories put a human face on the mortality numbers and serve as powerful reminders for every stakeholder in patient safety of the importance of putting an end to these preventable tragedies.
