Yes

If yes, was the APSS valuable?

Yes

## Commitment Details

---

### Commitment Update

Budgets that allow for an adequate number and quality of patient safety professionals. Implementation and ongoing monitoring of a comprehensive patient safety program that is approved by the Board of Directors. Creation of an internal working group made up of quality improvement, nursing, risk management, patient safety, patient advocacy and regulatory leaders. Re-engage and roll out our 'Good Catch' Program to recognize and reward staff for reporting near misses or system issues. Integration of PMC care partner safety and patient safety strategies and resources.

Please describe any best practices your organization has learned through your commitment and share valuable lessons or challenges that were overcome.

Safety has to be personalized for behaviors to change or be sustained. Alignment of patient safety and PMC care partner safety activities is an important consideration for PMC care partners to be engaged and for reliability.
