Commitment Details

Commitment Summary

Inadvertent air embolism causes serious mortality and morbidity in hospitalized patients.

Action Plan

Healthcare leadership should support the design and implementation of standards and provider training programs. Assess patient-specific increased risk for AE. Educate patients and families on AE risks, complications, signs and symptoms. Implement an EHR with decision making support to ensure that every patient has an AE prevention and detection plan in place at all times during hospitalization.

Impact Details

Lives Saved

Next, make a prediction (goal) from your baseline above for 1 year from today. We'll give you the opportunity to update us next year on the actuals:
