Commitment Details

Commitment Summary

1. Create insulin order sets that can be modified to reduce risks of hypoglycemia 2. Coordinate glucose monitoring, automate insulin dose calculations, insulin administration, and meal delivery during changes of shift and times of patient transfer 3. Continuously monitor the incidence of SH in the hospital 4. Use the results of this monitoring in staff education as a part of Continuous Quality Improvement (CQI) 5. Raise institutional awareness of issues through a system that compares hospital and nursing units based on performance quality scorecards

Action Plan

We will create SH information system to help us to detect SH, coordinate and monitor insulin administration, then conduct CQI program.

Impact Details

Lives Saved

Tell us about your baseline level of harm:

2

Lives Spared Harm:

2

Methodology for Determining Lives Saved:

According to SH annually incident reports and prevent harm to 0.
