Action Plan

Commitment Update

These concerns have been published in Neonatology Today as "Safety and Quality: Are They Compatible?" By Mitchell Goldstein, MD and T. Allen Merritt, MD, MHA. Some of the issues involved with the difficulty in "right sizing" technology have been discussed by the SOATT of the AAP. New efforts continue in the promotion of appropriate technologies for pediatric patients. There is a renewed effort by the FDA to develop advisory councils of practicing pediatricians and neonatologists to develop safer products.

Your commitment aligns with APSS
Please describe any best practices your organization has learned through your commitment and share valuable lessons or challenges that were overcome.
