Commitment Summary
Implementation and evaluation of the International Goals of Patient Safety

Commitment Description & Detail
Implementation and monthly evaluation by the body and Government of the Unit of the 6 International Goals of Patient Safety.

Action Plan
Schedule briefings with operational staff during shift links. Post posters and leaflets to make the project known. Ask the area heads to extend the project information. Schedule educational sessions in order to indoctrinate the operative staff. In case it is necessary to restructure the educational sessions based on the results of the evaluations and study of the 6 International Goals of Patient Safety. Employ John Kotter's Change Management Model (1. Create sense of urgency 2. Form a coalition 3. Create vision for change 4. Communicate vision 5. Remove obstacles 6. Ensure short-term achievements 7. Build On change 8. Anchor change to hospital culture). Generate indicators of structure, process and result that help us measure the impact and at the same time allow us to generate new improvement strategies.
