Commitment Description & Detail
Promote and develop clinical research in the population for the benefit of science, physicians and patients

Action Plan
1. Search for research protocols with pharmaceutical companies and CRA 2. Select patients with conditions that are sought to investigate with inclusion criteria and without exclusion criteria 3. Develop clinical research based on international standards to ensure patient safety and quality of research 4. Schedule educational sessions in order to train health personnel in good clinical practice or GCP 5. Establish a Committee of Ethics in Research to submit the protocols and attest that the research will be done primarily seeking patient safety 6. Establish an Ethics Committee to submit the protocols

Commitment Timeline
1 year
