Action Plan

- Review literature to include AWHONN and AGOG standards
- Review and update current policies and procedures for management of Preeclampsia and Magnesium Sulfate administration, as well as pharmaceutical management of hypertension in pregnancy
- Begin data collection and chart reviews for all Hypertensive disorders in pregnancy

Commitment Update

- Completed review of literature: AWHONN and AGOG standards - Continuing to review policies and procedures - Collaborating with physicians to provide a standardized treatment plan for patients presenting with risk factors or indications suggesting hypertensive disorders in pregnancy - Educating staff to recognize risk factors and indications suggesting hypertensive disorders in pregnancy

Other

Challenge 11 - Optimizing obstetric safety

Please describe any best practices your organization has learned through your commitment and share valuable lessons or challenges that were overcome

Following best practices we are looking at changing practice and following protocols for the early detection and management of hypertensive disorders in pregnancy. Our biggest challenge has been buy in from all physicians. We currently have a group of 6 physicians in our Parrish Obstetrics group with different backgrounds and experiences and 6 different ways of treating hypertensive disorders in pregnancy so standardizing practice is going to be our main focus. We will address this at our next OB/GYN Department meeting.

Impact Details

Initial Commitment	Commitment Update	Project Next Year
Lives Lost 0	Lives Lost 0	Lives Lost 0
Lives Spared Harm Target 0	Actual Lives Spared Harm in last 12 months 2	Lives Spared Harm Target for following calendar year 2
Lives Saved Target 0	Actual Lives Saved in last 12 months (might differ from initial target) 2	Projected Target of Lives Saved for following calendar to try to finish commitment 2

	New Lives Lost (lives lost – actual lives saved)
