**Action Plan**
HealthInsight understands that our training and intervention approach must be both valuable and innovative. We will bring our extensive experience in delivering effective training through a variety of modalities and, through our partnering relationships, will bring even more subject matter experts (SMEs) and innovation to our HIIN approach. Each program developed by the HealthInsight HIIN will incorporate the patient into the topic along with how to build upon a culture of safety in health care. A cornerstone to our training approach in HIIN will be utilization of the Project ECHO model. Project ECHO develops knowledge and capacity among community clinicians through case-based learning, knowledge networks and learning loops. HealthInsight will prioritize our action plan and

Commitment Update
The HealthInsight Hospital Improvement Innovation Network (HIIN) is pleased to have implemented its Antimicrobial Stewardship Project ECHO™ Collaborative, a series of monthly, process-driven clinical discussions conducted by subject matter experts focused on the core elements of antimicrobial stewardship programs. These elements include developing leadership buy-in, program accountability and actions to improve antimicrobial use; tracking and reporting; and education in the hospital setting. The HealthInsight HIIN is kicking off its second collaborative, focused on the implementation of best practices surrounding surgical site infection techniques, in February 2018. The team also provided a webinar series on systemic and behavior-based safety, as well as roundtables focused on readmissions.

Other
Challenge 1 - Culture of safety

Please describe any best practices your organization has learned through your commitment and share valuable lessons or challenges that were overcome
A best practice that has been identified is the use of the roundtable format. The meetings serve as technical assistance, as they use the tenants of adult learning to allow facilities to share information, best practices and effective tools. The webinars are interactive rather than didactic in nature. The HealthInsight HIIN values the concept of “all-teach/all-learn” with a priority on the “how to” of improvement.
