Action Plan

- Implement a plan that includes fundamentals of change outlined in the National Quality Forum safe practices, including awareness, accountability, and action.
- Hospital governance and senior administrative and medical and nursing leadership commit to become aware of this major performance gap in their own healthcare system.
- Hospital governance, senior administrative leadership, and clinical/safety leadership close their own performance gap by implementing a comprehensive approach to addressing the performance gap.
- Set a goal date to implement the plan to address the gap with measurable quality indicators.
- Allocate a budget for the plan to be evaluated by governance boards and senior administrative leaders.
- Clinical/safety leadership endorse the plan and drive implementation across all
Commitment Update
In the “Failure to Detect CCHD” program, we have established a pre-discharge blood oxygen concentration screening process for newborns, and designed a check list to provide information of screening data to parents. In addition, education and training for physicians and nursing staff in the baby room have been established. Everyone is familiar with this screening activity. Hence this screening has already started in mid-August.

Other
Challenge 7B - Failure to detect Critical Congenital Heart Disease (CCHD) in newborns

Please describe any best practices your organization has learned through your commitment and share valuable lessons or challenges that were overcome
Best practice learn from Actionable Patient Safety Solution (APSS) for #7B: FAILURE TO DETECT CRITICAL CONGENITAL HEART DISEASE (CCHD) IN NEWBORNS. The valuable lessons is established a pre-discharge blood oxygen concentration screening process for newborns, and designed a check list to provide information of screening data to parents.
