Action Plan
Catheter Associated UTI are a preventable and dangerous complication. Intermountain is implementing standard practices around catheter placement, maintenance, and removal to prevent these infections.

Commitment Update
Key efforts in 2018 include: * standardized pericare including standardized wipes and education to caregivers * implemented external collection systems to reduce the number of catheters placed * improved culture collection techniques to reduce contamination rates and improve data accuracy
Other
Challenge 2B - Catheter-associated urinary tract infections (CAUTI)

Please describe any best practices your organization has learned through your commitment and share valuable lessons or challenges that were overcome
* Use of standardized wipes and practices for pericare  * Use of external collection systems to reduce need for catheter placement  * Standard culture collection techniques to reduce contamination and prevent error
