Adverse Drug Event Reduction

What Patient Safety Challenge does your Commitment address?
Challenge 3A - Medication Errors

How Many Hospitals Will This Commitment Represent
21

Commitment Summary
medication errors have become increasingly common in the medical industry around the world. Medication errors contribute both directly and indirectly to patient morbidity and mortality and have been associated with injury, death and a sharp increase in medical cost. These also impact the medical community. The psychological trauma to healthcare professions who commit medication errors are a significant health concern because they pose significant negative impact on personal confidence, practice and status.
