Patient Safety Movement
52 Discovery
Irvine, CA 92618

Dear Patient Safety Movement:

MSL Healthcare Partners is excited to announce a partnership with the Patient Safety Movement. We look forward to partnering with the Patient Safety Movement with the goal of eliminating preventable deaths within the healthcare environment by 2020. We believe that all members of the healthcare community can work together to one day eliminate preventable errors in our healthcare environments. We have been working toward this goal since 2008 and now happily join the Patient Safety Movement to see this common goal fulfilled.

At MSL Healthcare Partners, we partner with healthcare organizations to make them safe beyond compliance. Our consultants provide consulting services to healthcare organizations across the United States within the areas of Environment of Care, Emergency Management, Life Safety, and Construction Risk Mitigation.

MSL Healthcare Partners commits to the following:

1. Spread the mission of OX2020 to MSL Healthcare Partners' clients and strategic partners.
2. At every opportunity, we will educate facility and safety professionals in their role to preventing hospital acquired infections.
3. During our discovery process, our team will illuminate potential infection prevention opportunities within the built environment.
4. Lead by example in terms of hand hygiene and risk mitigation.

Sincerely,

Steve Spaanbroek
MBA, FASHE, CHFM, CHC
