

Patient Safety

M O V E M E N T

zero preventable deaths by 2020

My Pledge of Cooperation

As leaders of our respective industries/professions, I believe that we must be collectively committed to improving patient safety.

I invite us to treat patient data that clinicians and patients buy our products for, including those coming from electronic medical records, infusion pumps, anesthesia machines and physiological monitors, as the patient's data and use it to empower patients, clinicians, and manufacturers to do what is best for those patients, regardless of where and when the patient's care is being provided.

To this end, I pledge, on behalf of my company and myself, to allow anyone who wants to improve patient safety, including medical technology companies and healthcare providers, to interface with our products to access the data that our products are purchased for, subject to all applicable privacy laws, without knowing interference or charge. By making this pledge I expect to be held accountable by others in the industry.

This is my pledge to making a better healthcare system, one step closer to ensuring there will be no more preventable deaths.

Please join me in making a pledge to make patient data that clinicians and patients buy our products for available to others in the industry for their use, a pledge that will save lives.

Yes, I want to make this pledge and hope to be held accountable for it.
