

The Brazilian Society of Anesthesiology Commitment to Action

The Brazilian Society of Anesthesiology (SBA) is pleased to announce their support of the Patient Safety Movement Foundation (PSMF) and mission to eliminate preventable deaths by 2020 (OX2020).

The Brazilian Society of Anesthesiology has the institutional mission of bringing together more than ten thousand anesthesiologists in Brazil, promoting continuous training, technical and scientific updating. The purpose of the institution is to provide a basis for the anesthesiologist to perform the most effective practices to ensure the quality and safety of medical care, and reduce morbidity and mortality related to all activities that permeate the physician assignments.

We are very proud of our partnership with the Patient Safety Movement Foundation. This Commitment to Action adds an important tool in our struggle to improve the standard of anesthesia care in Brazil.

As a committed organization, the SBA will demonstrate alliance with PSMF by:

1. Spreading the mission of OX2020 to SBA members and network
2. Identifying subject matter expertise within SBA to participate in the PSMF's Actionable Patient Safety Solution's (APSS) workgroups
3. Asking members of the SBA who are leaders working in hospitals to implement APSS, or share their own successful processes, to eliminate preventable deaths. And, make their own commitments to action to the PSMF.
4. Promoting the Patient Safety Movement Foundation through SBA's website and speaking engagements

We at the Brazilian Society of Anesthesiology are excited to announce our commitment to improve patient safety.

Signed,

Brazilian Society of Anesthesiology
