## Commitment to Action

RxTOOLKIT® is pleased to announce its support of the Patient Safety Movement Foundation (PSMF) and its mission to eliminate preventable deaths by 2020 (0X2020).

At the heart of every tool is RxTOOLKIT's mission—to **improve medication safety** by providing innovative and affordable applications for today's clinicians.

RxTOOLKIT's integrated approach combining process, technology, and competency lowers the potential for human error increasing safety for both caregivers and patients.

**TECHNOLOGY:** Clinically proven, easy to use, cloud-based applications deliver trusted data, create organizational efficiency, and increase safety.

**PROCESS:** Streamline, automate, and clearly define processes to increase efficiency and employee confidence and decrease the potential for error.

**COMPETENCY:** Ensure that staff meets a standard of excellence, provide on the spot training and reference, and track staff competencies throughout the entire year.

Through over 14 years of research and development by actual working pharmacists, our tools are clinically proven to improve medication safety.

We have concentrated the development of patient safety applications in the following areas:

### Dose Preparation:

***Increase accuracy, efficiency, and ensure the safety of all medications prior to administration.*** We automate and streamline dose preparation procedures and ensure staff competency through the full integration of standardized process.

RxTOOLKIT Dose Preparation Solutions provide barcode verification scanning, evidence based calculations, and compounding formulas.

We help ensure the accurate labeling of repackaged products, manage documentation, and confirm regulatory compliance.

### Dose Administration:

***Confirm patients receive the drug and dose intended for them and support staff with accurate information and integrated competency training.*** Intuitive and easy to use applications provide automation and standardization of procedures and information.

RxTOOLKIT Dose Administration Solutions increase precision, efficiency, and staff confidence during dose administration.

Evidence based methods and weight-based calculations provide accuracy and consistency ensuring the most vulnerable patients are protected.

**Information & Communication:**

***Manage important information and optimize communication between team members.*** Our tools put critical information quickly into the hands of team members who need it most.

RxTOOLKIT® provides specialized solutions designed to make clinician's jobs easier. We facilitate the cataloging and sharing of information with maximum efficiency in a secure and searchable environment—putting the information they need at their fingertips. We connect essential team members to information **and** to one another in a secure distraction-free environment.

When an organization uses RxTOOLKIT® to organize their most important information, the answers are always close at hand. All of our applications are intuitive, easy to navigate, and include a built-in search and report features — vital information is just a click away.

**Operational:**

***Expertly manage important resources.*** Our Operational Solutions maximize efficiency and promote economic stewardship in areas of inventory control, equipment, and staffing.

RxTOOLKIT provides tools to precisely track inventory and manage pharmacy transactions, including those between an organization and outside organizations. We help organize and improve employee scheduling—even for complex groups covering multiple shifts.

Our tools provide thorough and accurate documentation, the key for proving compliance with governing bodies and certification standards.

**RxTOOLKIT® eLEARNING™:**

**RxTOOLKIT eLEARNING™ enables any organization to operationalize best practices** — using trusted information, providing practical application, and integrating competency directly into the workplace.

Our mission is to provide specialized online training with both clinical and operational focus to increase safety, expand competency, boost confidence, and ensure success.

Our goal is to eradicate preventable medical errors and improve safety by elevating the educational standards of the healthcare community.

We make education a part of the everyday practice setting and provide year-round management and tracking.

As a committed organization, RxTOOLKIT will demonstrate alliance with the PSMF by the following:

1. Spreading the mission of OX2020 to RxTOOLKIT members and network
2. Participating in the PSMF's Actionable Patient Safety Solution's (APSS) workgroups and helping to identify subject matter experts to contribute to the development of interested topics
3. Asking members of RxTOOLKIT who are leaders working in the hospitals to implement APSS, or share their own successful processes, to eliminate preventable deaths. And, make their own commitments to action to the PSMF
4. Continuing to improve safety by elevating the educational standards of the clinical pharmacy community (RxTOOLKIT eLEARNING™: Pharmacy Technicians University, Integrated Competency Training, and Year-Round Competency Training/Tracking Program)

5. Continuing to improve safety through the development of new and innovative solutions in support of safety and clinical excellence
6. Continuing to develop affordable solutions, price our applications reasonably, and sell them at a price because we believe cost should not be a barrier to patient safety and that all practice settings should have access to life saving tools regardless of their size

We at RxTOOLKIT are excited to announce our commitment to the Patient Safety Movement Foundation to reduce preventable death and improve patient safety.

Signed,

RxTOOLKIT
