

The Global Network for Simulation in Healthcare (GNSH) is pleased to announce their support of the Patient Safety Movement Foundation and mission to eliminate preventable deaths by 2020 (OX2020).

The mission of the Global Network for Simulation in Healthcare is to advance healthcare training through modern approaches and innovative solutions. GNSH advocates for integration of simulation as part of high frequency, low dose training programs. Localized for the specific needs of individual healthcare teams. This in turn would enable teams to respond more quickly, affect proper care more timely, reduce preventable medical errors and reduce preventable deaths.

As a committed organization, GNSH will demonstrate alliance with PSMF by:

1. Spreading the mission of OX2020 through GNSH members and partners
 - a. Introducing GNSH partner organizations that share aligned missions and values to the PSMF
 - b. Focus GNSH partner organizations to help refine solutions for specific Actionable Patient Safety Solutions (APSS)
2. Participating in the PSMF's Actionable Patient Safety Solutions (APSS) workgroups to develop a Simulation Plan for select APSS beginning with Sepsis, Medication Errors, and Hospital Acquired Infections (initially around CAMBSI and CAUTI).
3. Annually disseminating APSS to members
4. Asking hospitals to implement APSS and make formal commitments through the PSMF to improve patient safety
5. Sharing progress with the PSMF regarding GNSH's initiatives, engaging the PSMF in the work where possible.
6. Help support the mission of PSMF by developing high frequency, low dose training programs where feasible.

We at the GNSH are excited to announce our commitment to improve patient safety.

Signed,

GNSH
