

Anesthesia Safety Network Commitment to Action

The Anesthesia Safety Network is pleased to announce their support of the Patient Safety Movement Foundation (PSMF) and mission to eliminate preventable deaths by 2020 (0X2020).

The Anesthesia Safety Network platform is an anonymous incident reporting system for healthcare professionals during the perioperative period. The main goal is to disseminate a patient safety culture using a range of tools (including for example newsletters, serious games about handoffs and the WHO checklist). The tools use gamification techniques to engage all the caregivers. This platform will also promote shared learning to prevent the recurrence of incidents that have previously resulted in avoidable deaths.

As a committed organization, the Anesthesia Safety Network will demonstrate alliance with PSMF by:

1. Spreading the Patient Safety Movement Foundation's mission of 0X2020 to Anesthesia Safety Network members and network
2. Participating in the PSMF's Actionable Patient Safety Solutions (APSS) workgroups and helping to identify subject matter experts to contribute to the development of aligned topics
3. Disseminating the PSMF's Actionable Patient Safety Solutions (APSS) to Anesthesia Patient Safety Network members and network
4. Jointly partnering and supporting projects around related patient safety topics of interest.
Examples include but are not limited to:

- a. Promoting one or multiple of the PSMF's APSS in the Anesthesia Safety Network newsletter
- b. Supporting upcoming events, educational opportunities and speaking engagement pertaining to both parties (*i.e. PSMF's Annual World Patient Safety, Science & Technology Summit*)

We at the Anesthesia Safety Network are excited to announce our commitment to improve patient safety.

Signed,

Anesthesia Safety Network
