Humanscape is pleased to announce its support of the Patient Safety Movement Foundation (PSMF) and its mission to eliminate preventable deaths in hospitals.

Under its mission “Living Healthier by Connecting Better”, Humanscape is building a blockchain-based ecosystem for patients with rare diseases. In this ecosystem, patients will be connected to critical resources such as medical information, patient communities, doctors, or therapeutics, which are currently not in the hands of the patients. This process will lead patients to broader treatment opportunities and ultimately to increased survival rates.

In addition, Humanscape will make sure patients have control over their health data by applying blockchain technology to its product. This will motivate and encourage patients to actively seek for ways to live healthier.

As a committed organization, Humanscape will demonstrate alliance with the PSMF by the following:

1. Spreading the mission of PSMF through Humanscape members and network
2. Participating in the PSMF’s Actionable Patient Safety Solution’s (APSS) workgroup(s) and helping to identify subject matter experts to contribute to the development of interested topics. (i.e. Person & Family Engagement)
3. Asking members of Humanscape who are leaders working in the hospitals to implement APSS, or share their own successful processes, to eliminate preventable deaths. And, make their own commitments to action to the PSMF
4. Promote upcoming events, educational opportunities and speaking engagement

We at Humanscape are excited to announce our commitment to the Patient Safety Movement Foundation to reduce preventable death and improve patient safety.

Signed,

Humanscape
