U.S. Anesthesia Partners
Commitment to Action

U.S. Anesthesia Partners (USAP) is pleased to announce their support of the Patient Safety Movement Foundation (PSMF) and mission to eliminate preventable harm and death in healthcare across the world.

USAP is committed to being the highest quality anesthesia practice in the world. We have invested in data collection, information sharing, analytics and education for our 4500 clinicians across the US and we continue to advance efforts to improve patient safety, clinical outcomes and patient and provider satisfaction. Our mission is perfectly aligned with that of the Patient Safety Movement Foundation.

As a committed organization, USAP will demonstrate alliance with PSMF by:

1. Spreading the PSMF's mission and vision to USAP members and network.
2. Participating in the PSMF's Actionable Patient Safety Solutions (APSS) relevant workgroups and helping to identify subject matter experts to contribute to the development of aligned topics. (i.e. Culture of Safety)
3. Annually disseminating the PSMF's APSS to anesthesiologists and a wide spectrum of other anesthesia providers as appropriate worldwide.
4. Jointing partnering and supporting projects around related patient safety topics of interest.
5. Asking members within USAP's network who are working in hospitals to implement APSS, or share their own successful processes, to eliminate preventable harm and death. And, make their own commitments to action to the PSMF.

We at U.S. Anesthesia Partners are excited to announce our commitment to improve patient safety.

Signed,

U.S. Anesthesia Partners
