

Antimicrobial Resistance Fighter Coalition Commitment to Action

The Antimicrobial Resistance Fighter Coalition is pleased to announce their support of the Patient Safety Movement Foundation (PSMF) and mission to eliminate preventable patient deaths across the globe by 2030.

Antimicrobial resistance (AMR) is one of the world's greatest threats to human health. Mortalities from AMR are projected to reach epidemic levels within our lifetimes, causing 10 million deaths by 2050, more than are caused by cancer today. Drug resistant infections are a risk across the healthcare continuum and put patient's safety at jeopardy. With improved focus on infection prevention, diagnostic/antibiotic stewardship and surveillance, we can eliminate preventable patient deaths and reduce the risk of AMR. The **Antimicrobial Resistance Fighter Coalition** is a global campaign to substantially increase awareness of AMR and encourage action across a wide range of stakeholders, including policymakers, health agency officials, professional societies, clinicians, patients and family members. Coalition members form a community of like-minded organizations, leaders and individuals united in their commitment to address the threat and burden of AMR. Learn more at <http://antimicrobialresistancefighters.org>.

As a committed organization, the Antimicrobial Resistance Fighter Coalition will demonstrate alliance with PSMF by:

1. Spreading the PSMF's mission and vision to Antimicrobial Resistance Fighter Coalition members and network.
2. Participating in the PSMF's Actionable Patient Safety Solutions (APSS) relevant workgroups and helping to identify subject matter experts to contribute to the development of aligned topics. Examples include but are not limited to:
 - a. *Healthcare-associated Infections*
 - b. *Medications*
3. Annually disseminating the PSMF's relevant APSS to Coalition members and network.
4. Encouraging Antimicrobial Resistance Fighter Coalition's network to submit their own stories on the PSMF's website to help drive the Foundation's narrative forward.
5. Jointing partnering and supporting projects around related patient safety topics of interest.
6. Staying in touch regarding upcoming events, educational opportunities and speaking engagements pertaining to either parties.
