

April 9, 2019

The Honorable Robin Kelly  
United States House of Representatives  
2416 Rayburn House Office Building  
Washington, DC 20515

Dear Representative Kelly:

The undersigned organizations dedicated to the health and wellbeing of mothers, children, and families write to express our support for the Mothers and Offspring Mortality and Morbidity Awareness (MOMMA) Act. We thank you for your leadership in introducing this important legislation to reverse the troubling trajectory in the rates of maternal mortality and morbidity in the United States.

Tragically, the United States ranks far below other developed nations in preventing pregnancy-related deaths and serious adverse outcomes. Each year, nearly 700 women die during or within a year of the end of their pregnancy due to pregnancy-related or pregnancy-associated complications. An additional 50,000 women experience severe complications that can negatively impact their long-term health. Black women are three to four times more likely to die of causes related to pregnancy than their white peers, a disparity that has both persisted and widened over time. Studies estimate that more than half of pregnancy-related deaths are preventable, and approximately half of maternal injuries could be reduced or eliminated with better care and enhanced maternal mortality data. Unfortunately, the current system fails to address the medical and social determinant factors that contribute to such high maternal mortality rates within the United States compared to other high-income countries.

The MOMMA Act seeks to address this issue through a comprehensive set of policies to improve data collection, disseminate information on effective interventions, and expand access to health care and social services for postpartum women. The legislation would bolster federal efforts to support states in collecting, standardizing, and sharing maternal mortality and morbidity data. In addition, it authorizes and expands existing federal grant programs dedicated to scaling best practices to improve maternity care. The MOMMA Act would also permit states to expand coverage under Medicaid, the Children's Health Insurance Program, and the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) through a longer post-partum period for women. Finally, the legislation would ensure improved access to culturally-competent care training and workforce practices throughout the care delivery system.

Our organizations are proud to support the MOMMA Act, and we look forward to working with you to improve the health and well-being of women, children, and families. If we can provide more information, please contact Rebecca Abbott, Deputy Director of Federal Affairs for Public Health at March of Dimes ([rabott@marchofdimes.org](mailto:rabott@marchofdimes.org) or 202.292.2750).

Sincerely,  
1,000 Days
